# Washroom technology is constantly evolving. With Thornthwaite Technologies, you're certain to find a solution to your shower, hand basin and urinal flushing needs.

Thornthwaite Technologies is the Australian distributor of Rada and Presto products, representing the leading manufacturers of tap ware, electronic washroom systems and shower accessories.

With over 75 years' experience in the Australian market, we understand that innovation can lead to great solutions. We work closely with our suppliers to develop reliable, high performance solutions that are approved to Australian Standards with high WELS ratings.

Our experienced team work with customers to select the right solution for their projects, followed up by exceptional customer care.

## WHY THORNTHWAITE?

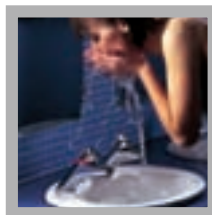

- Water and energy savings
- Comfort and hygiene
- Reliability
- Vandal resistance
- Easy installation and maintenance
- Exceptional pre and after sales support
- Technical expertise

## WHERE TO BUY

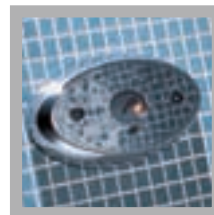

Our products are distributed via plumbing merchants around Australia, with spares and full products available with overnight delivery in most cases. Contact us for a merchant in your area.

## CONTACT US

Contact our sales team on **1300 137 170** to book an appointment or to discuss your needs. You can also visit [www.thornthwaite.com.au](http://www.thornthwaite.com.au) to find out more about our range, download technical information and specifications.

## MODERN WASHROOM SOLUTIONS

From fully managed systems to individual outlets or stylish accessories - our products are designed for reliable performance, low-cost maintenance, and most importantly for water savings.

### PRESTO TIMED-FLOW TAP WARE

Presto timed-flow taps and valves are highly-regarded for their water-saving technology, reliable performance, vandal resistance and low-cost maintenance. Manufactured from chrome-plated, corrosion resistant brass, Presto adds a stylish finish to any washroom, and can be installed as standard or security versions.

### RADA SENSE

Rada Sense is a sensor-operated washroom solution for showers and hand basins, and is particularly suited to hygiene critical areas, leisure washing facilities and corporate washrooms. Incorporating a digital mixing valve, all users see is a wall-mounted sensor to activate water flow and adjust the temperature to suit their own comfort by swiping their hand. Rada Sense enables facility managers to programme timed flow, duty flush, and retrieve service data via a PDA, and trained personnel can easily perform a thermal disinfection with the same equipment.

### RADA PULSE & MONO CONTROL

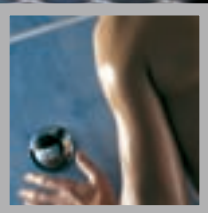

Rada Pulse and Rada Mono Control are sensor-activated washroom solutions that can manage up to ten outlets with Pulse or single outlets with Mono Control. Designed to make washroom management straightforward and maintenance cost-effective, our sensor products offer real flexibility for basins, showers and urinals in washing facilities.

### RADA TMVs

Rada thermostatic mixing valves (TMVs) are considered amongst the best available on the Australian market. With over 75 years of innovation and quality engineering, Rada TMVs feature the Radatherm sealed-for-life, service-free cartridge, which is designed to reduce time and cost spent on fault-finding and maintenance.

### RADA SHOWERHEADS

Compliment your washroom technology with stylish shower accessories that are designed specifically for water savings and for hard-wearing use. Rada showerheads provide an outstanding shower and are manufactured for vandal resistance, making them an ideal option for public, council, leisure-centre or any other high-use washroom.
