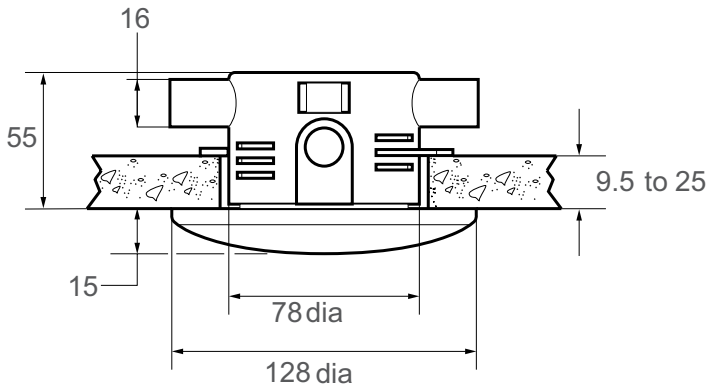
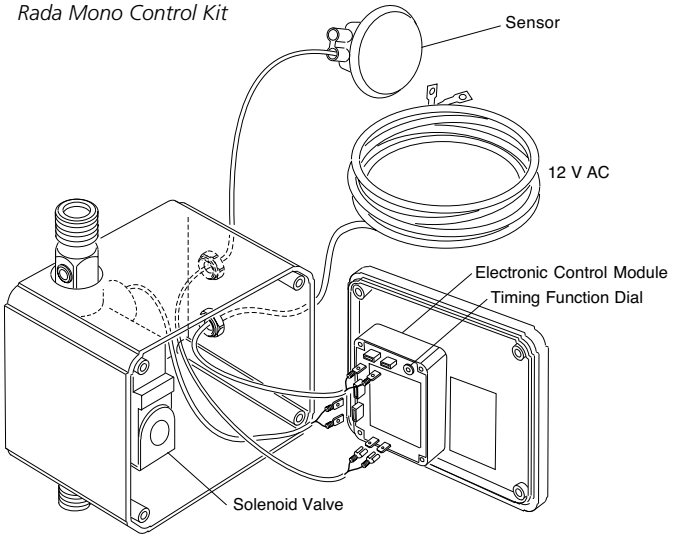
Rada 124 Sensor



Rada Mono Control Kit



About Rada Mono Control 07

Rada Mono Control sensor kits provide everything required to activate water flow to a single outlet. Each kit includes the sensor, installation box (control module and solenoid valve), inlet isolating ball valve, 12 V AC transformer and flow regulator (washbasins).

Sensors are supplied with 3m cable which can be extended by using CAT5 UTP or CAT5 STP twisted pair data cable (not supplied).

With Mono Control, your washroom will have many of the benefits of Rada Pulse: hands-free washing, sensor-activated timed flow and automatic shut-off.
